Introduction xi

HARDWARE ANNOYANCES CH. 1

2 Network Adapter Annoyances
A NIC Is a Network Card Is an Adapter
Finding an Embedded Adapter
It’s a Phone, It’s an Adapter, It’s...Phoneline Networking!
Enabling USB Ports
Unused Embedded Adapters

5 Ethernet Hardware Annoyances
Cabling Between Adjacent Rooms
Cabling Between Nonadjacent Rooms
Cabling Between Floors
Signal Interference
Cabling Outside the Walls—Inside the Room
Managing the Cable Between the Wall and the Computer
Wall Jacks
Adding a Hub to the System
Deciding Between a Hub and a Switch
Mixing Communication Speeds
Making Your Own Cable
Patch Versus Crossover Cable
Cable Distance Limits

12 Phoneline Hardware Annoyances
Sharing a Phone Jack
Sharing a Phoneline Network Adapter
Chaining Computers Together
Using Jacks from Different Phone Lines
Telephone Cable Problems
Create a Mini Phoneline Network
Phoneline Ports Are Labeled HPNA

15 Powerline Hardware Annoyances
Look for the HomePlug Logo
Power Strips and Powerline Devices
Powerline Networking from the Deck or Veranda
Installation Software Is a Must
What’s the Security Risk for Powerline Networks?
Security Passwords Must Match
Change the Default Security Password
Mixing Powerline with Other Network Topologies

18 Wireless Hardware Annoyances
Your Electric Garage Door Isn’t a Problem
Avoiding Stuff That Blocks Wireless Transmissions
WORKING WITH OMNIDIRECTIONAL ANTENNAS
Do I Need a Directional Antenna?
Signal Distance Problems
Don’t Get Too Close to the Router
Distance, but No Speed
Give Your Signal a Boost
Routers Are Also Access Points

21 TROUBLESHOOTING AND TECH-SUPPORT ANNOYANCES
Lights Flash During Communication
Interpreting the Colors of Lights
Using a Knowledge Base
Returning Broken Equipment
Returning Working Equipment

SOFTWARE ANNOYANCES CH.2

26 CONFIGURING NETWORK ADAPTERS
Getting the Facts from Your ISP
Do I Need to Use the Software from My ISP?
What Information Do I Need from My ISP?
What’s a Gateway?

28 CONFIGURING ROUTERS
Entering Information from Your ISP
Getting to the Router
Lost Router Login Name or Password
Why Change the Login Data for Routers?
What’s DHCP and Where Can I Get Some?
MAC Address? I Don’t Have a Mac!
Oh No, My Computer Is Using APIPA
Switching Laptop IP Address Settings
Between Work and Home
Can’t Log On to Different Networks
with Alternate Configuration
Network Switching Programs
Laptop Has Multiple Local Network Connections

36 CONFIGURING AND MANAGING USERS
Only One My Documents Folder in
Windows 98SE/Me
Enable User Profiles in Windows 98SE/Me
Automatic User Profile Folders Can Fool You
Create Users the Right Way in Windows 98SE/Me
Change User Profile Settings in Windows
98SE/Me
Move the My Documents Folder
Documents Don’t Travel with the My Documents
Folder
See a List of Usernames When You Log On to
Windows 98SE/Me
Family Logon Isn’t Available
Can’t Add Names to the Family Logon User List
Earlier Versions of Windows Are Not Secure
Can’t Bypass the User List in Windows XP
Eliminating Passwords Isn’t a Good Idea
Only Computer Administrators Can Create Users
in Windows 2000/XP
Logon Window Doesn’t Indicate Account Type
Password Disks Are Life Savers!

45 CONFIGURING THE DESKTOP
Other Users Can’t Find Software
Software Not Found Error
Display Resolution Is Global in Windows
XP/2000
Limited Users Cannot Change Power Settings
Copy Desktop Themes in Windows XP
Copy Desktop Designs in Earlier Versions of
Windows

48 INSTANT MESSENGER ANNOYANCES
Use Messenger to Chat Across the Network
Some Messenger Features Are Blocked
by Firewalls
Configure Windows XP SP2 Firewall for UPnP
Configure Software Firewalls for UPnP
Configure Router Firewalls for UPnP
Stop Messenger from Opening at Startup
Remove Windows Messenger from Windows XP
Use Built-in Messaging Utilities
Can’t Find winpopup.exe?

53 Software Support Annoyances
Getting Support for Windows Problems
Using the Microsoft Knowledge Base
Getting Support from Third-Party Sources

NETWORK ACCESS ANNOYANCES  CH.3

56 Finding Computers on Your Network
Windows Has a Window for Your Network
Hunt for My Network Places in Windows XP
Create a Link for My Network Places
Create a Desktop Shortcut for My Network Places
Add the Network Window to the Quick Launch Toolbar
Use Windows Explorer to Find Computers
Tricks for Quicker Access to Remote Computers

60 Troubleshooting Network Connectivity
New Computers Don’t Come to the Neighborhood
Turned Off Computers Still in the Neighborhood
Workgroup Name Must Be Identical on All Computers
Error Message Isn’t Specific
Install File and Printer Sharing Services
NetBIOS over TCP/IP Must Be Enabled
Open Network Properties Quickly
Ping Network Computers
Ping Failures
Ping an IP Address
Find a Computer’s IP Address

68 My Network Places Needs Housekeeping
Clean Out the Clutter
Local Folders Show Up in My Network Places
Get Rid of the Alphabet Breaks in My Network Places
Stop Shortcuts from Appearing in My Network Places
Shares You Never Accessed Appear in My Network Places
Disable the Search for New Shared Resources
A Network Shortcut Stops Working
Create Your Own Shortcuts for My Network Places
Network Shortcuts for Older Versions of Windows

75 Mapped Drives
Create a Mapped Drive Quickly
Choose a Drive Letter for a Mapped Drive
Automatically Reconnect a Mapped Drive
Windows 98SE Automatic Reconnection Options
Failed Automatic Reconnections in Windows XP
Failed Automatic Reconnections in Windows 2000
Failed Automatic Reconnections in Windows 98SE
Disconnect Means Delete the Mapped Drive Letter
Can’t Map a Network Shortcut
Map Shared Parent Folders
Prevent the Share from Opening When You Map a Drive
Use the Command Line to Map a Drive
Map Subfolders of Shared Folders
Determine the Available Drive Letters
Let the Computer Pick the Drive Letter for a Mapped Drive
Permanent versus Temporary Mapped Drives
Manipulate Files Between Local and Mapped Drives
Other Users Don’t Have the Mapped Drives

FILE-SHARING ANNOYANCES CH.4

84 Accessing Files on Remote Computers
Share Windows XP My Documents Folders on the Network
Share Windows 98SE/Me My Documents Folders on the Network

85 Manipulating Files on the Network
Drag Files Between Computers
Windows Explorer Display Is Annoying
Moving versus Copying
Use the Send To Command to Copy Files and Folders
My Send To Folder Is Missing
The Weirdness of the Recycle Bin
Use Remote Files in Software
Can’t Save Files on the Remote Computer?
File Contents Change Mysteriously
Use Software That Permits Simultaneous Users of the Same File
Collaborating on Files
Create a File Server
Map Local Folders to Drive Letters
Saving Database Datafiles
Database File Locking
Temporary File Locking of Database Datafiles
Back Up Database Files to Remote Computers
Using Software on a Remote Computer

95 Network Entertainment Centers
Connect Your Network to Gaming Devices
Music Everyone?

NETWORK PRINTING ANNOYANCES CH.5

98 Shared Printer Annoyances
What’s in a Name?
Older Computers Might Not Find the Printers
Display Detailed Descriptions of Printers
Install Drivers for Other Versions of Windows
Attach Multiple Printers to a Computer
Deciding on the Right Computer for a Print Server
Password-Protected Printers

101 Installing Remote (Network) Printers
Using the Add Printer Wizard
Install Network Printers from the Network Window
Quicker Ways to Install a Network Printer
Install a Printer Attached to a Mac

104 Managing Network Printing
Change the Order of Print Jobs
Pausing a Print Job Doesn’t Stop the Printer
Turning Off a Printer Causes a Paper Jam
Manually Fed Forms Hold Up Printing
Limit Printing Choices to Avoid Printing Errors
Find the Monochrome Option on Inkjet Printers
Preserve Color Cartridges

111 Troubleshooting Network Printers
Windows 9X Can Show a Printer as Ready When It Isn’t
Windows 9X Printer Status Messages Can Confuse You
Windows XP Printer Status Message Can Disappear
Check the Print Server’s Status
Print Server Logon Status Doesn’t Matter
What Happened to My Default Printer?
Notepad Can’t Change Printers
Move Print Jobs to Another Printer
Too Many Users Connected to the Print Server
New Connection Not Available When One User Stops Printing

115 Using Print Files
Print File Prints Garbage
Print Files That Work Everywhere

117 Network Printing and MS-DOS
Print to a Network Printer from MS-DOS Software
Redirect a Network Printer with Spaces in the Name
Find a Redirected Printer
Persistent Connections Are User Settings
Print Text from the Command Window
Redirecting Help Files to the Printer Fails
Print the Contents of a Drive or Folder

122 ISP Rules: Cutting Through the Confusion
Learn Whether Multiple Access Is Permitted
Mailboxes Are Single-User Access Points
Adding Mailboxes
Changing Your ISP Means Changing Your Email Address

124 Dial-Up Connection-Sharing Annoyances
Dial-Up Connection Doesn’t Remember Login Information
Dial-Up Connection Doesn’t Open Automatically
Windows XP Firewall and Dial-Up Connections
Dial-Up Connection Firewall Protects the Entire Network

Put a Dial-Up Connection Icon on the Task Bar
Close the Connection from Client Computers
Connection Terminates Unexpectedly
Terminate an Idle Connection
Network TCP/IP Settings Changed after Enabling ICS

130 Shared Broadband Annoyances
Outgrowing Your Router?
Wireless Router in a Wired Network?
Cable Modem Speed Variations
Cable Access Upload and Download Speed Differences
Uncap Cable Modem Speed
Buy Your Own Cable Modem and Save Money
Enhance Your DSL Speed
DSL Upload and Download Speed Differences
DSL Line Filters
DSL and Home Security Systems
Buying DSL Service from Third-Party Providers
Routers Are Not Specific to Modem Types
Routers and Firewalls
Wireless Access to a Wired Router
Connect Phoneline and Powerline Devices to a Router

137 Broadband Technical Support Annoyances
No Router Support from Your Service Provider
Recycle the Modem
How Can It Be a Cable Problem if the Television Works?
Cable Modems That Die Take Forever to Replace
Telephone Line Problems with DSL

139 Email Annoyances
Email Settings Remain the Same
Use Outlook Express on More than One Computer
Use Eudora on More than One Computer
142 AOL Annoyances
- AOL Dial-Up Doesn't Support Multiple Logons
- AOL Might Not Work with ICS
- AOL Broadband Requires Double Payments
- Mixing Broadband and Dial-Up AOL Accounts
- Default Router Settings Don't Support AOL Logins

**SECURITY ANNOYANCES** CH. 7

146 Firewall Annoyances
- Firewall? Where's the Fire?
- Windows XP Firewall Halts Network Traffic
- Windows XP Service Pack 2 Offers Improved Firewall
- Shared Telephone Modems Need Firewalls
- Windows XP Firewall for Broadband-Based ICS
- Safeguarding Older Computers
- Routers Can Protect Your Network
- Stateful Inspection Can Tell Who's Lying
- Software Firewalls Go Both Ways
- Stop Firewall Pop-Up Notifications
- Don't Block Outgoing Firewall Pop-Up Notifications
- Approved Outgoing Programs Ask for Permission Again
- Check the Program before You Give Permission
- Which Computers Should Have a Software Firewall?
- Test the Firewall

152 Viruses, Worms, and Other Slimy Creatures
- Antivirus Software Slows Me Down
- You Don't Need Email to Get a Virus
- A Virus Disguised As a Document
- Virus Scan Takes Forever
- Select Mapped Drives for a Virus Scan
- Scan Two Drives
- Scan the Entire Network
- What's Heuristic Scanning?
- Schedule Scans for the Middle of the Night
- What's with This Constant Updating?
- Antivirus Program Update Requires a Reboot
- Turn Off Automatic Updating
- My ISP Scans for Viruses, Why Should I?
- Antivirus Software Won't Install
- Don't Get Fooled by Virus Hoaxes

157 Wireless Security Issues
- Wireless Security Limitations
- WEP Disabled by Default
- WPA Support in Windows XP
- Wireless Devices Don't Support WPA
- Using Default Settings Is a Bad Idea
- Wireless Security Setup Isn't Secure
- Security for Laptop Computers

161 File and Folder Security
- User-Level Controls in Windows 98SE/Me
- Default Permission Options for Share-Level Controls
- Local Users Don't Need a Password to Access a Protected Folder
- Default Permission Options for Shared Folders in Windows XP
- Share the Windows XP Shared Documents Folder over the Network
- Find the Shared Documents Folder on the Network
- Private Folder Feature in Windows XP Requires NTFS
- Some Folders Can't Be Marked Private
- Turn Simple File Sharing Off in Windows XP Professional
Install Software and Make It Private in Windows XP Home Edition
Make Software Datafiles Private in Windows XP Home Edition
Share Some, But Not All, of Your Documents
Work on Private Documents from a Remote Computer
Hide Shared Folders
Hidden Shares with Shared Parent Folders Aren’t Really Hidden
Who’s Visiting My Computer?
Install Net Watcher
Disconnect Remote Users

MAINTENANCE ANNOYANCES Ch.8

172 Documentation and Record Keeping
   Document Computer Settings
   Track Installed Software
   A Picture Is Worth a Thousand Words

174 Backing Up Information
   Backing Up Entire Drives Isn’t Necessary
   Install Backup Equipment on One Computer
   Choosing a Backup Device
   Rotate Backup Disks
   Using Backup Software
   Automate Backup Software
   Can’t Find Windows Backup Software in Windows XP Home Edition
   My Computer Didn’t Come with a Windows CD
   Use the Send To Command for Copying User Data
   My Documents Has No Send To Command on the Shortcut Menu
   Backup Data Not Kept in My Documents
   Back Up Favorites and Cookies
   Use a Batch File to Back Up Data

Create Batch Files That Copy Files for Multiple Users
Exit Command Doesn’t Work in Older Windows Versions
Automate Backup Batch Files
Top-Down Backups Are Easier
Clean Out the Backed-Up Data Folders
Backing Up to CDs
Enforce the “Back Up Your Files” Rule

184 Upgrading the Network
   Install New Hardware Drivers
   Install Hardware Firmware Upgrades
   Install Operating System Updates Across the Network

EXPANDING THE NETWORK APP

190 Creating a Blueprint
   Distance Maximums
   Locating Hardware in the Right Places
   Create Separate Networks and Link Them Together

194 Minimum Equipment Requirements
   Ethernet Minimum Requirements
   Wireless Minimum Requirements
   Powerline and Phoneline Minimum Requirements

195 Compatibility Issues
   Upgrade to Windows XP
   Upgrade Windows XP Computers to Service Pack 2
   Wireless Alphabet Soup Compatibility
   Wireless Security Compatibility
197 Signal Interference Issues
   Wireless Interference
   Ethernet Interference
   Powerline Interference
   Phoneline Interference

198 Nifty Network Devices
   Routers with Firewalls
   Print Servers
   Standalone Hard Drives

199 Multilink Phone Modems to Increase Speed
   Configure Windows 98SE/Me for Multilinking
   Configure Windows XP for Multilinking
   Using the Multilink Connection

201 Home Entertainment Devices
